RAIL ANALYSIS SURVEY
NORTH VIETNAM

25X1D

The "RAIL ANALYSIS SURVEY, NORTH VIETNAM" provides a consolidated machine listing of all rail activity observed and is published on a periodic basis based upon new mission inputs into NPIC. The listing is cumulative [redacted]

The machine tabulation provides the following information, from left to right, in one or more line entries.

A. FIRST LINE

(1) Rail Line Number -- major rail lines are arbitrarily numbered one (1) through six (6) and are shown with their respective terminal points listed on a base map and key, also included in this report. All rail lines are fully operational and single track. Trains observed on untargeted rail lines are designated "UNN" for unnumbered.

(2) Train Position -- the alpha column, immediately following the rail line number, will contain the code indicator of the train position (M-mainline, Y-yard, S-siding).

(3) Speed -- speeds are computed approximately and are in miles-per-hour. "UN", for undetermined, is used when the speed cannot be determined.

(4) Direction -- direction of train movement is shown in the overall direction of the rail line. "P" indicates the train or cars are standing.

(5) Geographic Coordinates -- those coordinates computed for the center position of the train or yard. All coordinates are derived from the AMS Series L509, scale 1:250,000.

(6) Number and Type of Engines, Cars -- cars are listed as box, flat, gondola, hopper, tank, passenger, and caboose, and U/I (unidentified). The term "Open" indicates a gondola or hopper car; "Closed" indicates a box or passenger car; and either form is used only when a more specific identification cannot be made. When the number of cars is undetermined, the best estimate is given preceded by an "E" (Ex: E011 U/I car).

(7) Percent of Coverage -- estimated percentage of rail line(s) covered by a given mission.

(8) Limiting Factors -- the following abbreviations, with their definitions in parentheses, are used: PQ (poor image quality), HC (heavy cloud cover), SC (scattered cloud cover), H (haze), O (oblique), C (clear), and PC (partial coverage, used when a mission covers only a portion of a train or yard).

(9) Time -- Zulu time as indicated on the photography.

(10) Mission Number/Date -- the mission and date of photography from which the report is derived.

(11) Country -- the standard country code, two-letter designator for North Vietnam (VN).

B. SECOND LINE

(1) Second and additional lines, as required, are utilized to report Number and Type of Engines/Cars.

When no trains are observed on a given mission, the rail line, percentage of cover, mission number and date of photography and the country code are recorded. "None" will be recorded in the column designated Number and Type of Engines/Cars.

The machine program provides for three separate runs or sorts and is presented in the report in the following sequence.

Date of Information Sequence	Part I
Geographic Coordinates Sequence	Part II
Rail line Number Sequence	Part III

Rail Line Number	From	To	Maps	
			WAC	AMS L509 1:250,000
1	Hanoi Area 21-05N 105-55E (Junction with line 2)	Lao Kay 22-31N 103-59E	0616	NF 48-6 NF 48-10 NF 48-11
2	Hanoi 21-01N 105-51E (Junction with line 4)	Dong Dang 21-58N 106-42E (China/North Vietnam border)	0616	NF 48-11 NF 48-12
3	Hanoi Area 21-03N 105-53E (Junction with line 2)	Haiphong 20-52N 106-41E	0616	NF 48-11 NF 48-15 NF 48-16
